

770-422-4218

V723 VersaHandler Telescopic Tool Carrier

The V723 has a rated load capacity of 7,000 pounds and a lift height of 23 feet, allowing you to lift heavier loads even higher. It takes the power and reach of the V518 one step farther for jobs that simply require more. The V723 truly fuses the height and reach of a forklift with the ground engaging capabilities of a loader. Whether it's digging, grading, loading or handling and placing material, this popular model offers the superior level of performance necessary to satisfy what your toughest jobs demand. This model comes with a frame leveling feature, allowing you to ensure more accurate load placement in uneven terrain conditions. Like all VersaHandler TTC models, the V723 is available with a canopy or fully enclosed climate-controlled comfort cab.

269 cubic in Turbocharged 100 HP Diesel

Auxiliary Std Flow 21 GPM

Operating Weight 15827 lbs
